Difficult. there is a certain reason. because the Earth is too great. the radius of 6370 km. the equatorial circumference of 4 km. the Earth s surface up to 5.1 million square kilometers. In contrast. people are too small. and the naked eye sees only the earth that such an ambitious study of geography like numerous reclamation and really do not know where to start. In fact. readers do not be afraid. we can use different weapons: (1) globe - to solve three-dimensional and spherical geographical knowledge; (2) map - geographic knowledge to solve the plane. [plus a little sky map - geographic objects to solve high school aspects of geography]. If we map a solid grasp of knowledge. to find the key to entry. the key to learning. that can do the map of geographical knowledge. all over the world are not afraid. you learn for life s geography. afraid of what the college entrance examination! You stand in the open wild look around. see the hemispherical dome - as Guren Jiang s days like Qionglu. enveloped fieldwork (see right). In fact. this can be seen as a three-dimensional map. where the sun rises for the East (in English EAST. said prefix E). the moon goes down to the West (English West. said prefix W) - this is actually the Earth from west to east rotation results. Together with North (English North. said prefix N) and South (English South. prefix S is). you can identify the direction - on the north-up. left the East to the West the...
