This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

I do not think that I will be accused of exaggeration, or of an attempt to appeal sensationally to the reader, if I advance the opinion that more money is lost, and more families are ruined, by the purchase of questionable and fraudulent mining and other stocks than result from any other cause, in business and out of business, except, perhaps, intemperance. There are now before the public, and there may be for many years, thousands of alleged investment propositions, all of them sensationally advertised, and most of them offering little other than promises to do what cannot be done, and what their promoters know is impossible of accomplishment. They are virtually wholesale or retail separators of the people from their money, and their existence is responsible for an unrealized proportion of people among the great middle class who are in precarious financial circumstances. Heavy losses, which produce present suffering and affect the protection of the future, probably drive more men and women to the bad, and injure more children by depriving them of the necessities of existence, than does...
