The same nonsense syllables were used as described in Experiment C. In Experiment F, however, each slip was studied until it could be repeated correctly before another slip was learned. Usually five or six slips were learned in the time allowed. Complete records were taken from two subjects only, Sd and Hn. The former added the sheets twice in succession ten times, and added the sheets preceded by the syllables ten times. The latter did this but five times. The following table gives the results. The work was done at the same hour each day in the case of both subjects. Table X. It is seen by this table that the number of seconds for adding...
