We do not remark there either translation or locomotion properly so called. The orientation of the oscillatory motion passes briskly, and without following any law, from one direction to another. In the cellules of the epidermis, the pigmentary granulations having less than five or six thousandths of a millimeter in diameter, are animated with this motion of vibration; the grains of chlorophyll in the green cellules, and probably all the cellular granulations whose surrounding liquid is not solidified, likewise manifest this movement. It is observed also in gold particles, in little grains of iridium, platinum, coal, lime, c., c., in milk globules, and more generally in all viscous globules immersed in water or in liquids that have little resistance. The phenomenon occurs also in the little gas-bubbles imprisoned in...
