

Antiphony

By Chris Katsaropoulos

Luminis Books, Incorporated. Paperback. Book Condition: new. BRAND NEW, Antiphony, Chris Katsaropoulos, Theodore Reveil is one of the leading lights in String Theory physics, on his way to present his latest research at a triumphant meeting of his colleagues from around the world, when he realises he has lost the notes for his presentation. At the podium, in the midst of his distraction and confusion, he poses the question: "What if the universe, instead of being a giant machine, is really a giant thought?" Then he crosses a line which he can never step back over again, saying, "The infinities and singularities in these equations may be telling us that what we are missing is unknowable in terms of physical science. These unsolvable terms in our equations may be road-signs pointing to consciousness-to God-as the missing piece of the puzzle." Antiphony traces the downward spiral of Theodore's career in the wake of what he has said, and the remarkable transformation that leads him into the depths of madness .or the revelation of the Final Theory, the ultimate secret of the universe.
