

Progress in Ultrafast Intense Laser Science: Volume IV

Filesize: 2.6 MB

Reviews

The book is great and fantastic. It is probably the most remarkable pdf i have got read through. You can expect to like the way the article writer compose this ebook.

(Mr. Ethel Schmeler)

PROGRESS IN ULTRAFAST INTENSE LASER SCIENCE: VOLUME IV

To get **Progress in Ultrafast Intense Laser Science: Volume IV** PDF, make sure you refer to the hyperlink listed below and download the document or have access to additional information which are in conjunction with PROGRESS IN ULTRAFAST INTENSE LASER SCIENCE: VOLUME IV ebook.

Springer. Hardcover. Book Condition: New. Hardcover. 266 pages. Dimensions: 9.5in. x 6.4in. x 0.8in. It is a great pleasure that we are now publishing the fourth volume of the series on PUILS, through which we have been introducing the progress in ultrafast intense laser science, the frontiers of which are rapidly expanding, thanks to the progress in ultrashort and high-power laser technologies. The interdisciplinary nature of this research field is attracting researchers with different expertise and backgrounds. As in the previous volumes on PUILS, each chapter in the present volume, which is in the range of 1525 pages, begins with an introduction in which a clear and concise account of the significance of the topic is given, followed by a description of the authors most recent research results. All the chapters are peer-reviewed. The articles of this fourth volume cover a diverse range of the interdisciplinary research field, and the topics may be grouped into four categories: strong field ionization of atoms (Chaps. 12), excitation, ionization and fragmentation of molecules (Chaps. 35), nonlinear intense optical phenomena and attosecond pulses (Chaps. 68), and laser solid interactions and photoemissions (Chaps. 911). This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Hardcover.
